

coreboot - Bug #120

kconfig_lint: False positives about duplicate choice symbols

05/20/2017 05:01 PM - Nico Huber

Status:	New	Start date:	05/20/2017
Priority:	Normal	Due date:	
Assignee:	Martin Roth	% Done:	0%

Target version:			
Description			
<p>kconfig_lint checks that a choice contains each symbol only once. That makes it impossible to have different rules for one symbol for different dependencies. It forces me to either write generic prompts, help texts and convoluted rules or to add additional symbols (cf. https://review.coreboot.org/#/c/19804/3/src/device/Kconfig@572).</p>
