

coreboot - Bug #149

tianocore fails with: Error: The specified tag is invalid

11/09/2017 04:55 PM - Vasya Boytsov

Status:	New	Start date:	11/09/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Using the latest master, if I select the tianocore payload with either mater or stable tianocore release it prints: Error: The specified tag is invalid make[1]: *** [Makefile:24: fetch] Error 1 make: *** [payloads/external/Makefile.inc:72: payloads/external/SeaBIOS/seabios/out/bios.bin.elf]			

History

#1 - 11/09/2017 06:24 PM - Vasya Boytsov

This happens when one changes payload from SeaBIOS to tianocore.
