nvrncui and coreinfo show "No coreboot tables were found.",
if the toolchain is made with "make crossgcc-x64".

When the toolchain is made with "make crossgcc-i386", nvrncui and coreinfo both work as expected.

I am working on a t520; with coreboot dated on March, 19th, 2018.

#2 - 08/15/2018 06:14 PM - Martin Roth

- Subject changed from "No coreboot tables were found" to nvrncui and coreinfo show "No coreboot tables were found." if the toolchain is made with "make crossgcc-x64".
