

coreboot - Bug #30

board-status allows invalid uploads

02/04/2016 09:52 PM - Timothy Pearson

Status: New	Start date: 02/04/2016
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description board-status uses the GIT hash of the parent coreboot tree in its commits, but does not check to make sure that the user actually booted the same GIT hash before merrily uploading an invalid status report. board-status should verify (via the coreboot tables) that the user has actually booted from a build of the GIT hash in the parent coreboot tree before allowing upload.
